# A FASCINATION FOR THE BATHROOM

Sensuousness and sensibility – KEUCO’s passion for the bathroom runs through its veins, and this is evident in our products. A KEUCO bathroom awakens the emotions. It is an intimate place of well-being. It conveys elegance and luxury, and it combines aesthetics, ergonomics and functionality.

In no other room is this challenge more exciting and demanding than the bathroom. That is why this fascination still drives us forward. Since its founding in the year 1953, our company, which is still family-run today, has undergone a rapid and sustained transformation. From market leader for high quality bathroom accessories, KEUCO has evolved into the brand for the bathroom, with a wide assortment of furniture, fittings, accessories and mirror cabinets and from our early days we focused on offering concepts of complete bathroom furnishings.

Important factors contributing to our success are the contemporary, technically innovative products, the highest standard of quality, a clear orientation towards design, and state-of-the-art manufacturing facilities. Today, KEUCO products are sold around the world, and are market leaders in many areas. They are the result of intensive development work, the use of the best materials, and the most careful workmanship. We combine high-tech manufacturing and involved hand craftsmanship to achieve optimum results. KEUCO quality sets standards: Our products will convince you by their immaculate surfaces, maximum longevity, and perfect functionality. Each article is examined individually before being shipped out.

At KEUCO, the subject of design already played a pivotal role long before it even became a general topic of conversation. Our understanding of design involves striving to achieve classic-modern aesthetics that retain their contemporary feel, even after many years of use. Whether designed in-house or in cooperation with internationally recognized designers – KEUCO products are regularly distinguished by renowned awards.

But timeless design and long-lasting product quality are only two aspects of our sustainability philosophy. Equally important are responsible company management, and resource-saving production – with the help of our own water conditioning system for our electroplating plant, for example. We view the label “Made in Germany” as commitment to the kind of company management that aims to secure jobs in the long term.

KEUCO products are made in our own production plants in Hemer, Gütersloh and Bünde. Inland production provides us with a close proximity that is essential, so that we can develop and utilize the know-how of our employees on a long term basis, and so achieve seamless quality management. And that makes “Made in Germany” a promise of quality.

# KEUCO – WELCOME AROUND THE WORLD.

*KEUCO can be found anywhere where very high demands of comfort, quality and aesthetics are made on bathrooms: In first-class hotels, luxury cruise ships, in exclusive residential properties, in spas and holiday resorts.*

## Shanghai Oriental Art Centre

Opera houses are temples of culture. With the Shanghai Oriental Art Centre, Parisian architect Paul Andreu has created one of the most beautiful opera houses in Asia, maybe even the most beautiful of all. When bathroom furnishings were being chosen, the choice fell upon KEUCO's. After all, nothing should detract from the overall aesthetics during a night at the opera.

## Peninsula Hotel Beijing

China is crying out for products "Made in Germany". At least when it comes to select bathroom fittings. With the Peninsula Hotel Beijing KEUCO has supplied its products to yet another prestigious project in the Middle Kingdom. All 582 rooms and suites – at the top address in the capital – have been equipped with EDITION 100 accessories.

## Jumeirah Islands

Anyone using the bathroom at one of the 736 luxury villas of the Jumeirah Islands will find KEUCO there. 21,160 accessories made in Hemer contribute to the unique atmosphere of the artificial paradise vacation located in the United Arab Emirates.

## Hotel Cosmo

An attraction for creative, cosmopolitan and business travellers: The Hotel COSMO in Berlin boasts bathroom fittings with clean lines, minimalist design and a touch of glamour – quite simply KEUCO.

FREEDOM IS  
HAVING A VARIETY  
OF POSSIBILITIES.

# PURE DESIGN – BUT NOT PURITANICAL.

The renowned design agency Tesseraux+Partner was commissioned to design EDITION 11. At first glance and at every use the fittings and accessories convey a feeling of: Here is where perfect quality can be found.

The immaculate, hand-polished surfaces, the most careful of workmanship, the most modern of technology, corrosion-free fasteners, and the meticulous checks for leak-proof results on each individual fitting: Only this way a quality grade can be achieved at a level that one can see, appreciate, and which constantly pays off.

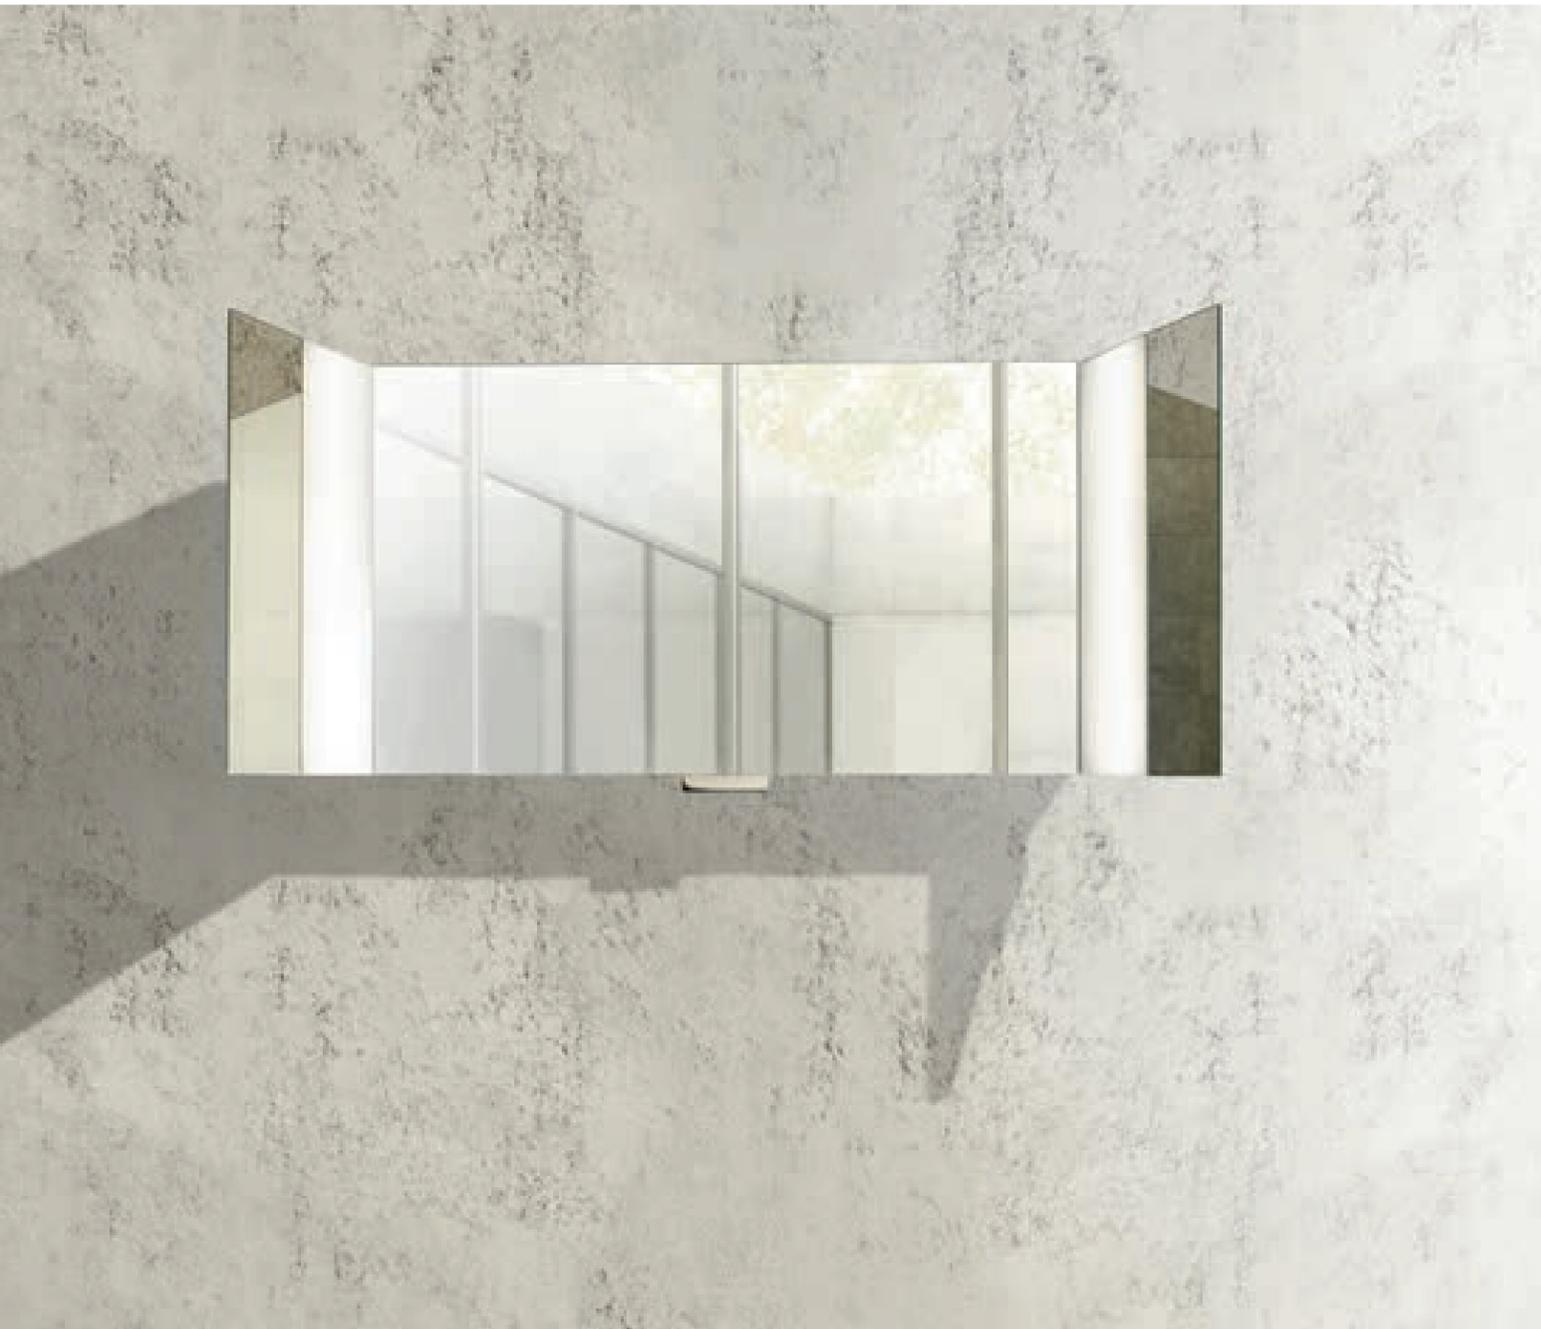

reddot design award  
winner 2012

Tesseraux+Partner  
Dominik Tesseraux

Because of its versatility, EDITION 11 offers the highest degree of freedom in bathroom design. This is assured by the selection of surfaces, the range of sizes and many other areas where a choice is available. The fronts, which seem to float on the face of the furniture, lend a special lightweight and elegant feel to the furniture. When the front drawer of the vanity unit glides open, its interior light switches on automatically. Tidiness is made easy with the freely positionable storage boxes. By combining two sizes, a generous work area is created beside the ceramic washbasin.

EDITION 11 mirror cabinets are available as two basic types: On one hand the classic with doors opening to the side (as seen on the following double page); on the other hand with a lift up door, as in the model pictured here. This model has pivotable mirror wings with integrated light modules.

The intelligent details inside ensure that one looks forward to the time spent in the bathroom in the morning. In addition to the mirrored rear wall there is also a horizontally slidable interior mirror with a height adjustable cosmetic mirror. Added to that are electric sockets and as an option a docking station for iPods and iPhones with an extra AUX input for other players. In this model high quality speakers are already integrated. This takes mirror cabinet comfort to an entirely new level.

The EDITION 11 mirror cabinet model with pivotable doors opening to the side is available in panorama sizes up to 2800 mm. In addition to the standard widths of 700, 1050 and 1400 mm more widths can be configured by using freely combinable individual modules of 350 or 700 mm.

The generosity of these EDITION 11 mirror cabinets not only impresses on the outside, but on the inside too. For example, the full mirroring of the rear wall and the inner surfaces of the doors, satin grips, the conveniently placed sockets, an optimal sound system, and many more details.

Three-hole fittings with a difference: Temperature regulation on the left, flow rate on the right. After adjusting to your own desired temperature, by pulling it up, the regulator can be returned to its initial position so that the temperature setting is retained. Below that is a wall fitting with single-lever mixer. As with all EDITION 11 washbasin fittings, the single-lever mixer has a flow rate limiter.

Shower rail and hand shower reiterate the weightless elegance of the design of EDITION 11. In the four-hole bath-edge fitting with hand held pencil shower head the basic quadratic form of EDITION 11 is reflected in the decor disc. The bath tub mixer shines in immaculate chrome lustre, with flow and temperature regulators situated on the side.

The soap holder has a removable crystal dish. The hand blown tumblers in the double holder are also made of the same high quality material. The fixed towel holder and the towel ring are characterized by simple, fully thought-through shapes. The latter has a spacer which ensures that damp towels can dry properly with sufficient ventilation space away from the wall.

The shower basket with rail is easy to clean and offers generous space for soaps, shampoos, and similar. Because of its rounded form on the inner surface, the grab rail, with its concisely crafted edges, has an especially pleasant feel to it.

EDITION 300

CHARACTER  
INSTEAD OF  
INDIFFERENCE.

# STRIKING DESIGN, WELL THOUGHT-OUT ERGONOMICALLY.

KEUCO design is determined by aesthetics, functionality and ergonomics, not by the kind of logic that characterizes mass production. The fittings and accessories of EDITION 300 clearly exemplify this philosophy and make it something to be experienced. Convenience of use coupled with striking elegance. The brilliance of the perfectly worked surface emphasizes the characteristic contours.

reddot design award  
winner 2006

Tesseraux+Partner  
Dominik Tesseraux

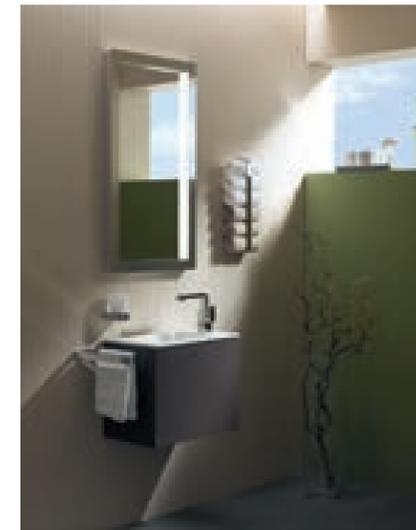

Uncompromising in bathroom planning: For everything you envisage EDITION 300 has a matching product for you. You can choose between wall, single-hole and triple-hole washbasin fittings; between light mirrors and mirror cabinets, and between different dimensions and surface combinations. All according to our motto: The more freedom there is in planning, the longer the enjoyment in use. When opening, the drawers of the vanity units slide without a sound. Their dividers offer you intelligently organized storage space in which your body-care utensils won't get mixed up.

The bath-edge fitting is a new development consistent with the EDITION 300 design line. For the shower fittings you can choose between on wall or in-wall installation. All according to your own individual taste and to suit the local construction conditions.

The guest WC is a special calling card in every house. With its impressive functionality and stylish elegance, EDITION 300 is ideally equipped to leave an excellent impression with your guests. With the small, only slightly projecting washbasin size it's possible to design even guest WCs with much charm. Even the towel holder and the vanity unit with front drawer and integrated towel opening offer much comfort for small rooms.

At KEUCO accessories are much more than just useful additions. It is also important that they can be blended in any combination to form a harmonious visual whole, perfectly coordinated to the characteristic design of the rest of the bathroom furnishings. EDITION 300 does this beautifully.

ELEGANCE

VARIETY AS  
PRINCIPLE.

# THE DESIGN CLASSIC WITH PROFILE.

Initially begun in 1967 purely as line of accessories, ELEGANCE established itself internationally over the decades and became the biggest selling bathroom series in the world. Today, ELEGANCE offers a comprehensive assortment with a wide array of models. The demand for ELEGANCE products still remains steady today thanks among other things to its timelessly modern design.

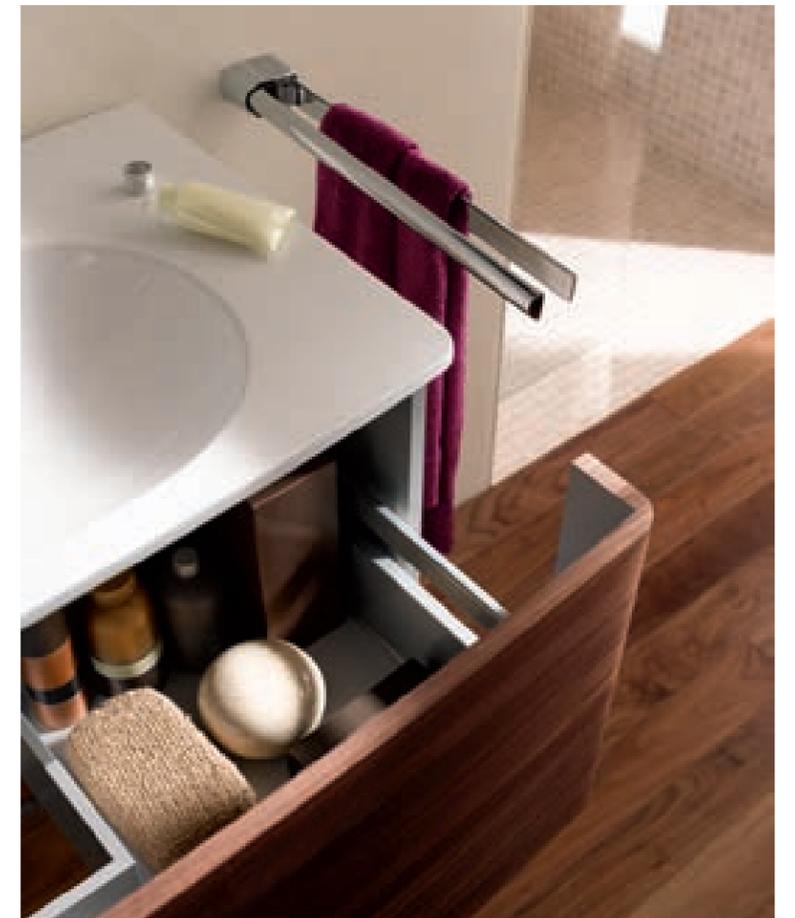

.molldesign  
Reiner Moll

Complete bathroom furnishings with many different design options: Again and again ELEGANCE sets trend-setting accents for the future in the bathroom. Whether cupboards, lights and mirrors, fittings, vanity units or accessories, you experience a collection that combines perfection and sensuousness in a highly aesthetic way.

Bright but not glaring: The light mirror stylishly provides indirect lighting. The front surface of the horizontal lighting element also has a mirror. The solitary lights with light opening on the sides are perfectly coordinated.

Combinations à la carte: Shower solutions can be flexibly adjusted to suit all spaces and your personal preferences, of course. Hand shower or head shower, flush or surface mounting – the choice is all yours.

Right angles and straight lines, coupled with vibrant curves. As in the entire collection, ELEGANCE fittings convince by their striking, classic-modern design.

A level of quality that one not only sees, but appreciates: ELEGANCE fittings and accessories are perfect down to the finest detail. The special brilliance of the immaculate, hand-polished chrome surfaces and the heavy quality of the accessories turn their use into an aesthetic and sensuous experience.

PLAN

# THE EVOLUTION OF COMFORT.

# TIMELESSLY MODERN AND INCREDIBLY VERSATILE.

With 450 individual products, PLAN is one of the most extensive bathroom collections in the world. PLAN is as varied as the lifestyles of today and the breadth and depth of its large assortment enables individual, tailored solutions to be found. PLAN leaves nothing to be desired – not from an aesthetic or an ergonomic point of view, as the main focus of the PLAN CARE range offers an additional wide collection of barrier-free products to choose from.

DESIGN PLUS

reddot design award  
winner 2006

.moll  
Reiner Moll

PLAN always remains unmistakably PLAN – but nevertheless offers you all the possibilities you need to achieve your own furnishing style. The furniture is available in both genuine wood veneer as well as white or black lacquered. The middle unit roller shutter made of white glass integrates harmoniously into the overall setting.

The fittings are as pleasant to use as is the purity of their forms. Whether chrome-plated, stainless steel, or with aluminium finish: The excellent design and the unmatched quality of PLAN fittings manifest themselves in each individual piece. And fully thought-through design sometimes demonstrates itself in a very discreet way: In the extreme ease of cleaning, for example.

PLAN blue fittings not only shine in terms of their impeccable surfaces and uncompromising functionality, but also with a consistently implemented sustainability concept. PLAN blue fittings help save water and energy in daily use; one example is the flow limiter in the washbasin mixer which limits to six litres per minute.

The large variety of PLAN blue products is also reflected in the shower. Depending on your personal taste, the overhead and hand showers come directly out of the wall or, alternatively, from the fitting. And the classic, height-adjustable combined solution is naturally also available.

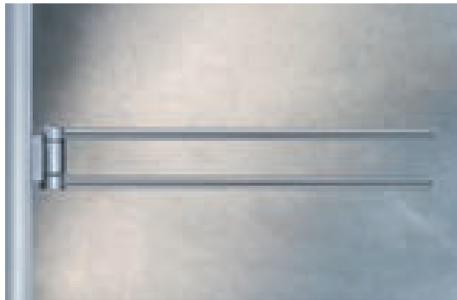

Overall, PLAN is the most comprehensive and transformable of all KEUCO collections. This is evident also in the guest WC. The number of variations PLAN offers makes possible elegant solutions, even in the smallest of rooms. And the single-lever mixer, the sensor fitting and the pillar tap also set the standard in terms of functionality.

The wide range of surface variants multiplies the diversity of PLAN even more. Choose from chrome-plated, aluminium and stainless steel. On the left: A heavy-duty lotion dispenser.

Innovative, elegant and of uncompromising quality: PLAN accessories stand out aesthetically as well as functionally. On this page: Grab rail, towel holder and towel hooks. The flawless surface of the toilet paper holder on the right delights users.

ROYAL REFLEX

# THE SUBJECT OF GLASS REDISCOVERED FOR THE BATHROOM.

basin mixer PLAN blue, accessories PLAN

# HYGIENIC, ROBUST, PERFECT.

Even over the decades glass with a lacquered underside still loses none of its brilliance and its colour intensity. Because of the way it reflects light it adds a special atmosphere to every bathroom. ROYAL REFLEX is always an eye-catcher – whether in strong, powerful tones or in discreet colours.

.molldesign  
Reiner Moll

single lever bath tub mixer PLAN, basin mixer and lotion dispenser ELEGANCE

basin mixer and lotion dispenser ELEGANCE

Our passion for detail makes daily use of ROYAL REFLEX a pleasure not only in terms of aesthetics, but also functionality. Contained behind the gently gliding front drawers with handles on the sides is a sophisticated storage system in which every bathroom utensil finds a suitable place. Intelligent storage details: The hanging wooden box is slidable and easy to take out. The dividers fixed by magnets on the base of the front drawer can be positioned as you desire.

A light, floating overall feeling of classical modernity is created by clear lines and reflected light. The wide range of surfaces and body variations adapt individually to a variety of living styles. Different materials in beautiful harmony: Lustred glass front and matt body; on top of this a cast mineral washbasin. Perfectly coordinated with this: The handle on the side in anodized aluminium.

basin mixer PLAN blue, accessories PLAN

basin mixer PLAN blue, accessories PLAN

With its perfect dimensions ROYAL REFLEX adds elegance and generosity even to small guest WCs. The vanity unit with front drawer creates storage space even in a small area.

If glass is so important, then mirrors are indispensable. ROYAL REFLEX offers mirror cabinets and light mirrors in customary, outstanding KEUCO quality – matching all sizes from the double washbasin right down to compact models for the guest WC.

Unobtrusive elegance: Just as with the mirror cabinets, the light mirrors are also available in all six washbasin sizes. The mirror is framed on both sides by the vertical lighting. Glass shelves behind doors with mirrors on both sides offer plenty of storage space. Two interior electric sockets and one exterior light switch provide perfect functionality.

basin mixer and lotion dispenser ELEGANCE

MIRROR CABINETS

BEAUTIFUL  
OUTSIDE,  
CLEVER INSIDE.

basin mixer PLAN blue

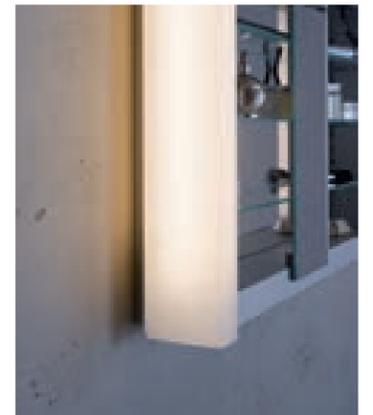

# THE MULTIFUNCTIONAL ROOM WONDERS.

We are passionate about mirror cabinets for many reasons. One of them is that they are true room wonders: They create space for all kinds of bathroom utensils but still don't take up valuable bathroom space. Instead they bring the mirror closer to the face in a practical way.

# CLEAR LINES WITH URBAN ELEGANCE.

With its lights on the sides ROYAL METROPOL is a genuine eye-catcher on the wall. The upward opening door reveals an interior with mirrors. An additional sideways sliding interior mirror, which can be positioned in front of the face as needed, is attached in front of the glass shelves.

# CREATIVE PLAY WITH LIGHT.

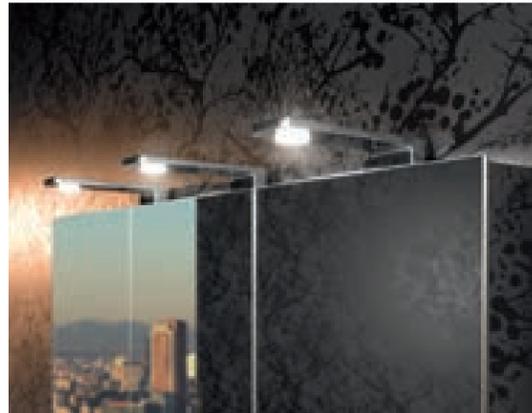

The models are attractive not only because of their elegant shape, but also their intelligent lighting concept. Elegant, transparent light fields are integrated in the front of ROYAL T1 on the upper edge.

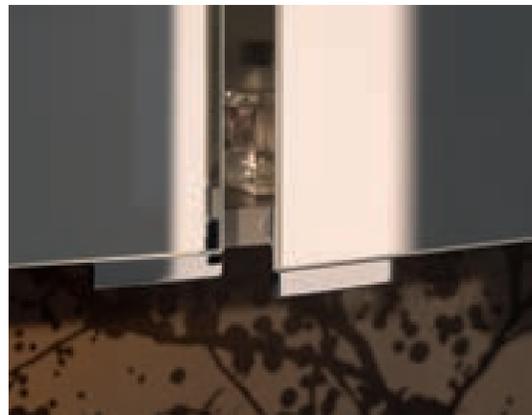

A characteristic trait of ROYAL T2 is its striking vertical lights which light up the room, but also the interior of the cabinet when it is open.

# INNOVATION MEETS DESIGN.

The particularly slim shape of the lights of ROYAL UNIVERSE was made possible by the use of space-saving LED technology. Modern semiconductor technology means high light yield at considerably reduced energy consumption, but it still provides a pleasant, warm white light. Thanks to the freely positionable glass shelves, the storage space inside can be adapted to your own personal needs.

LITTLE HELPERS  
WITH A BIG IMPACT.

Elegance from circular and spherical shapes: With their decorative disc, ASTOR accessories radiate aristocratic sparkle in the bathroom. On the left the chrome-plated towel ring. Above: Lotion dispenser made of opal glass with matt finish, soap holder with crystal soap dish, tumbler holder with crystal glass tumbler, and toilet paper holder with lid.

The whole universe of accessories: Our universal articles leave no wish unfulfilled because they offer the proper solution for every need. They are just as suitable for the private area as they are for public areas. Thanks to their practical and functional design and the different variations, they blend harmoniously into every bathroom.

Practical, high quality and compatible with any style – discover the diversity of KEUCO's universal articles. Top: Toilet brushes and double toilet paper holder; right: The foam soap dispenser.

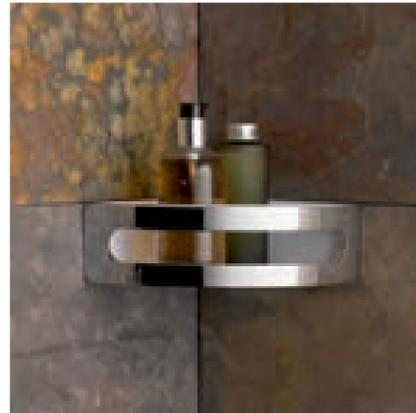

Now that's an eye-catcher: Cosmetic mirrors of every kind. Illuminated or non-illuminated, table models, wall models, various sizes with many kinds of adjustment options. After all, not only should your bathroom look good, but you should too.

With its battery operated, non-glare LED semiconductor technology and distortion-free optics the iLook meets professional standards. The model offers a wide array of setup options and if desired is also available with wall installation rail and additional mains adapter. On the right a cosmetic mirror from the ELEGANCE collection.

Durable, easy-to-clean – and simply beautiful. The huge variety of KEUCO accessory designs carries on with the soap wire baskets. The different shapes, surfaces, dimensions and variants for corner or wall mounting offer the right solution for every bathroom.

COMFORT THAT  
GROWS ALONG  
WITH YOUR  
EXPECTATIONS.

# PLANNING BATHROOMS FIT FOR THE FUTURE.

Ergonomics and safety in the bathroom are topics that are getting more and more attention. Today, ideal planning of the bathroom includes making sure that it can be adapted to the growing needs of comfort over the years. Here, KEUCO CARE products make it possible to combine comfort with aesthetics in the bathroom.

The ELEGANCE rail system brings elegant comfort into the bathroom: The rail system can be combined as needed with the existing bathroom furnishings.

The practical shower tip-up seat with back rest can be hung onto the rail system in a simple step, and taken off again as needed. The permanently mounted model is 450 mm wide and also suitable for public sanitary areas.

From the height adjustable washbasin to the pivoted supporting rail; from the rail system to the wall mirror with adjustable inclination: With KEUCO, bathrooms can be furnished to be anywhere from extra comfortable to wheelchair accessible.

WE'RE PASSIONATE ABOUT  
IMMACULATE PRODUCTS.

**14945**  
**Shower curtain PLAN\***  
all sizes are custom made. Please specify: material, colour, full length and width

**\*Notes on production characteristics:**  
Vertical seams, reinforced stainless steel eyelets, distance between the eyelets approx. 20 cm, roll hem stainless steel weighted, 50 g per metre, complete with curtain rings, white.

**Notes on sizes:** The sizes indicated are the sizes of the finished curtain. To prevent the curtain from touching the ground we recommend a distance from curtain to floor of approx. 30 mm. Distance between the middle of the curtain rod and the upper edge of the curtain approx. 40 mm. The width of the curtain should be approx. 1.3 to 1.5 times the length of the shower curtain rod.

**The following applies to all quality types:**  
shower-proof, fungicide, antibacterial, (shrinkage rate 1–3%), tested for harmful substances according to oeko-Tex Standard 100

**NB:** all mirror cabinets illustrated in this brochure have the German specification. International electrical specifications on our products will vary according to individual countries' regulations and standards.

In accordance with our manufacturer's guarantee declaration, we assume a guarantee of five years for our products, provided that the product was verifiably purchased and installed by a franchised trade dealer.

The guarantee period commences with the date of delivery ex works. The statutory warranty period is included in the guarantee period. This guarantee excludes electrical components and light bulbs.

The extraordinary surface characteristics and extremely fine colour nuances of our products can only be reproduced to a certain degree in print. Only the original KEUCO products, which can be viewed in sanitary trade dealers' showrooms, can provide you with an optimum impression.

Reproduction and copying, even if only excerpts, are only permitted by explicit permission of the manufacturer, and with the inclusion of source information  
KEUCO GmbH & Co. KG, Postfach 1365, D-58653 Hemer

We reserve the right to make engineering changes for the purpose of improvement, as well as colour and design changes that are deemed necessary. Errors and omissions excepted.

Our articles are sold exclusively through sanitary wholesale.
