

Making the Everyday
Extraordinary

STAINLESS STEEL SINK COLLECTIONS

*American
Standard*

The beauty of American Standard stainless steel

It goes without saying that our industrial-strength stainless steel is resistant to dents, UV rays and germs. These four American Standard stainless steel sink collections also meet a variety of design needs—from classically traditional to strikingly modern—while delivering the utmost in functionality. Discover sinks that make sense, with the features that matter most to you.

For moments that matter
For generations, we have been helping people enjoy daily living in the kitchen. Brewing the morning coffee. Washing little hands. Prepping for holiday meals. American Standard has delivered ease, functionality and style to millions of households.

Innovations both large and small make the everyday that much more meaningful. Corners that ease cleaning. Sizes that accommodate a variety of kitchen lifestyles. American Standard improves those moments that matter.

Why choose American Standard Sinks?

From small to large, single to double bowl, American Standard is sure to have a sink to fit your needs. Our sinks are made with you in mind, with multiple designs to choose from and several installation options for both replacement and custom solutions. For the utmost in convenience, every collection comes with standard waste fittings, instructions, hardware and cutout templates.

Quiet

American Standard sinks come with sound protection for quieter and more enjoyable use, day in and day out.

SoundSecure™: Rubber sound pads on the bottom of your sink to help reduce excess sound and vibration during everyday use.

SoundSecure+: Exceptional sound deadening with rubber sound pads on both the bottom and sides on the underside of your sink.

Protected

StoneLock™: Our multilayer spray insulation covers the underside of your sink to further help with sound absorption and to minimize condensation.

Durable

Stainless steel comes in many different shapes and sizes, but it also can come in a variety of thicknesses. American Standard offers both 18- and 20-gauge, durable T304 stainless steel. See each collection for specific gauge.

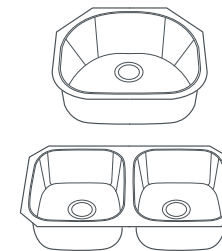

Warranty

The only thing more reliable than our sinks is our word. We back our stainless steel sinks with an equally durable Lifetime Limited Warranty, plus a 1-year Warranty on all accessories.

How to Select the Right Sink for Your Kitchen

Style, size, price and configuration are just some of the factors you consider when buying a sink. But the most important is lifestyle. How do you use your kitchen? Do you entertain a lot? Which sink will make those everyday tasks easier?

Configuration

Wash a lot of baking pans? Try a larger, deeper single-bowl sink. Divide and conquer with a dual-level sink featuring one oversized bowl and one small bowl for prep or cleanup. Or consider a double bowl for wash-and-rinse simplicity.

Installation

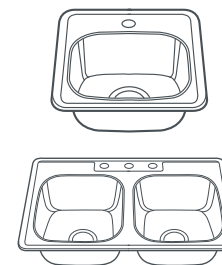

Top mount sinks, also known as “drop-in” sinks, are installed above the counter. They come in popular sizes for easy replacement needs.

Under mount sinks mount directly to the underside of the countertop, creating a custom look that also simplifies cleanup. Professional installation is recommended.

Dual mount sinks can be installed on top of or under the counter, offering additional installation convenience.

Faucet and Faucet Holes

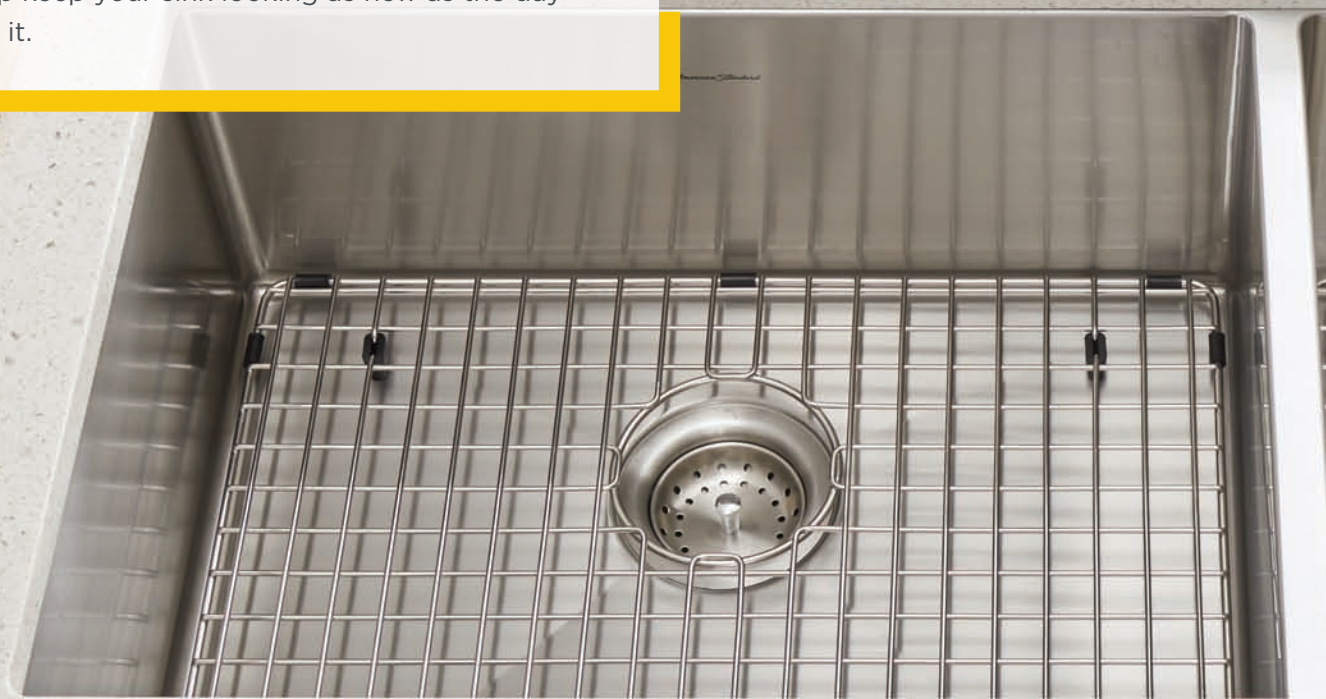

Your sink and faucet go hand in hand when it comes to tackling everyday tasks in your kitchen. For that reason, there are a few things to keep in mind when pairing the two together.

When purchasing a **top or dual mount sink**, consider your faucet and accessories before choosing how many holes you'll need. For example, if you want to install your faucet without a deck plate, you may need only one hole, but if you have a faucet with a side spray and deck plate, you may need four.

When purchasing an **under mount sink**, you have the flexibility to drill holes into your countertop for your faucet, rather than use holes on the deck of your sink. Make sure there is enough clearance on your countertop to install your faucet with any accessories wanted, such as a deck plate or soap dispenser.

Pekoe® Kitchen Sink Collection

Superior modern design with crisp lines and slim curves, Pekoe delivers upscale style. Contemporary covered corners look great and make cleanup easy. Comes with bottom grids to help keep your sink looking as new as the day you bought it.
