

# Designer Collection

## Foreword

Wellness viewed in a holistic way is of great interest and importance for many people today. From the beginning, promoting wellness for individuals and improving the quality of their lives has been the focus of MTI in the design and function of its products and therapies. Products must be beautiful and therapies state-of-the-art, but all must be therapeutic in their function.

While the desire for holistic wellness is a popular trend today, it has been MTI's motivation and purpose for decades.

## Table of Contents

MTI Wellness.....	6

# The Designer Collection

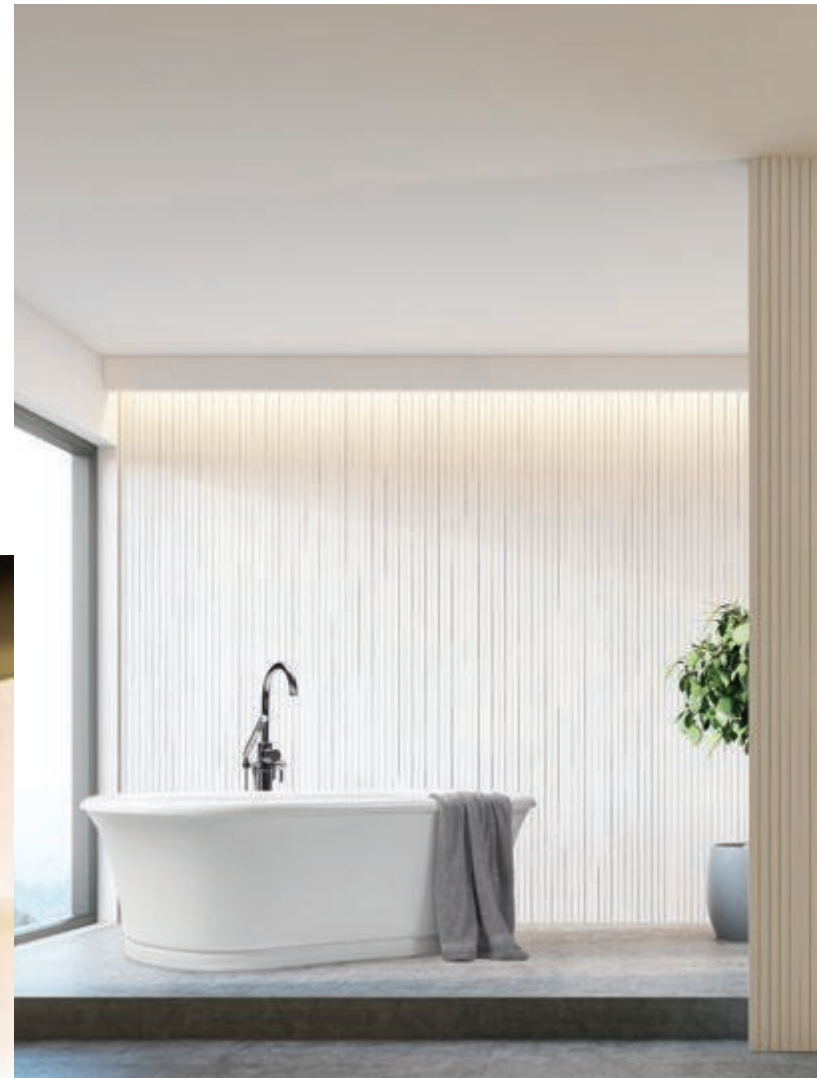

## ULTIMATE IN CUSTOMIZATION

With MTI you have the possibility of creating your own highly personalized bathing experience with many therapy choices, options and even component placement.

## AWARD-WINNING DESIGNS

In the last two decades MTI has been recognized with well over 100 awards for design excellence and product innovation. Testimony to our philosophy of design with purpose.

## CHOICE OF MATERIALS

For a choice of design and therapy possibilities, you can choose from designs in Lucite cross-linked cast acrylic or our new mineral composite material.

## MTI WELLNESS™

Promoting wellness for individuals and improving the quality of their lives has always been the focus of MTI through water therapies for wellness as well as therapy through sight, sound, smell and touch.

## MADE IN THE USA

All of our products are proudly made in the USA, handcrafted by artisans and manufactured to the highest quality standards.

## EXTENSIVE COLLECTION

There are so many different designs, styles, shapes and sizes from which to choose. Freestanding, drop-in and undermount tubs to satisfy personal preference and setting. Go to [mtibaths.com](http://mtibaths.com) to view the entire collection.

# MTI Wellness™ is hydrotherapy

Using the power of water to heal and renew.

MTI is a recognized leader when it comes to the technology of modern hydrotherapy, offering six distinct types of hydrotherapy experiences.

### Soaking Bath

The most elemental form of hydrotherapy is the soaking bath, where heat and water's natural buoyancy foster deep relaxation.

### Air Bath

The blissful combination of water, heat and air movement creates an incomparable effect that is as therapeutic as it is relaxing.

### Stream Bath®

Create the ultimate soaking tub by replicating the feeling and sounds of sitting in a tranquil forest stream.

### Air / Whirlpool Combination Bath

Enjoy the best of both worlds with this fully adjustable hydrotherapy system. Select the light full-body massage of an air bath, the deep penetrating massage of a whirlpool or both simultaneously.

### Whirlpool Bath

Enjoy the power of a deep, penetrating massage. This type of hydrotherapy comes from strategically placed jets that may be targeted to specific areas of the body.

### Air / Stream Combination Bath

This combination lets you enjoy the feeling and sounds of a gentle forest stream or the effervescence of a natural bubbling spring.

# MTI Wellness™ is sensory therapies

Delivering therapy through the senses. For a more holistic experience, enhance your hydrotherapy with the complementing therapies from MTI.

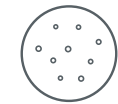

## AROMATHERAPY

This ancient therapy uses natural aromatic essences to promote holistic health. Most MTI air bath systems for drop-in tubs include a built-in aromatherapy diffusion system that delivers the aromatic essences through the air bath bubbles.

## THERMAL THERAPY

Heat soothes and relaxes. Keep your water hot longer with an inline heater that will maintain your water temperature at 104°F. You can also warm the tub's backrest and floor with radiant heat.

## MICROBUBBLES

For health and beauty. Innovative technology fills the tub with billions of tiny bubbles as small as the head of a pin, turning the water milky white, to cleanse and gently exfoliate the skin. The result is skin that is hydrated, moisturized and restored, feeling soft, smooth and supple.

## AUDIOTHERAPY

Audiotherapy uses our sense of hearing to relieve stress and foster relaxation. The sounds of gently flowing water are soothing, but you can also use the power of music to relax. With Stereo H2O you will not only hear but actually feel the sound through your body as it travels through the water.

## CHROMATHERAPY

Light and color affect human bio-rhythms and life equilibrium. Most MTI baths offer the possibility of including the therapeutic effects of chromatherapy through the use of underwater lighting provided by digitally controlled LEDs.

# Introducing Mineral Composite Tubs

The Designer Collection expands with tubs fashioned in a new mineral composite material, enabling new design possibilities, shapes and exacting details.

## **The Material**

MTI's mineral composite material is made of natural minerals mined locally in Georgia from a large natural granite and marble resource, bound together by a high-grade casting resin.

## **The Finish**

The smooth, white glossy finish is provided by a high-performance polyresin coating specially formulated for MTI with superior characteristics. Each product is hand-finished for beauty.

## **The Result**

MTI mineral composite tubs have high insulating properties for longer soaks and are shock-resistant for durability. The non-porous surface is UV- and stain-resistant for easy care.

Available Fall 2018.

**CHARLOTTE** • 66" x 32" • #400

The classic charm and simplicity of this tub allows it to be at home in virtually any surrounding. The graceful curves at each end are complemented by the delicately detailed rounded rim.

# Andrea® Sculpted Finish Tubs

ANDREA tubs shown with 1, 3 and 4 sides Sculpted Finish.

**Teak seat**  
optional for andrea models with armrests

**Slim-line integrated overflow with toe-tap drain**  
optional for all andrea models

**Integral armrests**  
optional for most andrea models

At MTI, Sculpted Finish® describes both a look and a process. The look is seamless, as if the tub were hand-molded out of a single piece of material. The process involves a series of painstakingly detailed steps, all performed by hand by the craftsmen at MTI.

MTI inventiveness permits individuals to craft their own one-of-a-kind tub. The Andrea® drop-in tubs on the following page may also be ordered with Sculpted Finish on one, two or three sides, or even transformed into a freestanding tub!

# MTI Wellness™

Selecting a Designer Collection acrylic tub gives you the broadest availability of therapies.

## HYDROTHERAPIES FOR WELLNESS

No other substance on Earth can match the healing properties and restorative powers of water. For untold generations, people have recognized water as a natural medicine, one that can ease the body and calm the spirit. Hydrotherapy harnesses the life-giving power of water and uses it to provide relief and comfort to those who suffer from all manner of aches and pains.

### Soaking Bath

A simple soaking bath is the most elemental form of hydrotherapy where heat and the water's natural buoyancy foster deep relaxation. Designer soaking tubs are ergonomically designed for maximum comfort with lumbar support and backrest angles to accommodate different needs and preferences.

### Stream Bath®

Stream Bath creates the ultimate soaking tub by replicating the feeling of sitting in a tranquil forest stream. Directional slotted vents provide a slow-moving, gentle current of water created by a whisper-quiet pump. The current of water is very soothing and relaxing, and the sound of the moving water is equally therapeutic.

### Air Bath

An air bath provides a gentle, full-body massage that is restorative and relaxing. MTI's air bath system places the air jets on the floor of the tub to provide maximum coverage of the bather's body with millions of tiny bubbles. The air bubbles come in contact with skin, open the pores and raise the capillaries toward the surface to detoxify the bather. Two different air bath packages are available.

If Air Elite is selected, either alone or in combination with a whirlpool, the control key pad includes a wonderful feature called **Spa Mode**. This provides 3 pre-programmed settings that will sequence through the various therapies in different combinations to create a spa experience that is energetic, relaxing or deep tissue.

### Whirlpool Bath

This hydrotherapy utilizes a mixture of water and air that is drawn in from the bathtub by a pump and then propelled toward the bather through jets. It provides a deep, penetrating massage that can be targeted at different parts of the body. This is perfect for tired, strained muscles. Two whirlpool equipment packages are available, with pulsating Tsubo massage included in the Ultra Whirlpool packages.

### Combination Air Bath & Stream Bath

Expand your options. You can select a package that combines Stream Bath with either of the two air bath packages available. So depending on your mood and needs, you can enjoy the ultimate soaking tub with Stream Bath, or experience the full-body massage of an air bath.

### Combination Air & Whirlpool Bath

Enjoy the best of both worlds with an air / whirlpool bath combination. You can select the light full-body massage of an air bath, the deep penetrating massage of a whirlpool or both therapies simultaneously. Different therapies for different moments, or even for different household members.

If either combination above is selected with Air Massage Elite, **Spa Mode** is included.

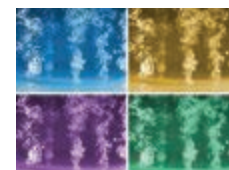

## SENSORY THERAPIES

Sensory therapies appeal to our senses of smell, sight, hearing and touch. Each of these therapies is naturally therapeutic, healing and beneficial. When combined with the power of water, however, an incomparable combination for promoting wellness is created.

### Aromatherapy

This ancient therapy uses aromatic essences naturally extracted from plants to harmonize and promote health of body, mind and spirit. Different aromatic essences have different effects. Most MTI air bath systems for drop-in tubs include a built-in aromatherapy diffusion system to allow the bather to enjoy the benefits of this ancient form of therapy while bathing. When the air bath is operating, millions of tiny air bubbles carry the aromatic essence through the water to the surface, where the bubbles pop and release the aromatic power of the essential oils.

### Chromatherapy

For centuries, light and color have been recognized as having an effect on human bio-rhythms and life equilibrium. Different colors affect individuals differently. Most MTI baths offer the possibility of including the therapeutic effects of chromatherapy through the use of underwater lighting provided by digitally controlled LEDs. A control button allows selection of constant colors or preset programs to achieve the desired lighting.

### Thermotherapy

Thermotherapy uses heat to soothe, quiet and relax the body, making hot water an essential ingredient in any form of hydrotherapy. It will even make the body more receptive to the benefits of an air bath or whirlpool. Recirculating water heaters are available to be used with the various forms of hydrotherapy so you can enjoy them longer, and you can even have radiant heat installed to warm the tub's backrest and floor. See more details on p 51.

### Audiotherapy

Audiotherapy uses another one of our senses to promote wellness by relieving stress and fostering relaxation. The soothing sounds of the gently flowing Stream Bath are certainly restorative. But you can also use the power of music to soothe, relax and revive. MTI's Stereo H2O integrates electronic transducers into the bath shell, essentially transforming it into a sounding board so the bather not only hears the sounds but also feels the music through the body as it travels through the bath water. Learn more about the two versions available on p 50.

### Microbubbles

Microbubbles innovative technology super-saturates the water with up to 50% more dissolved oxygen than regular water alone. Billions of tiny oxygen-rich microbubbles gently remove impurities from skin and pores, leaving the body cleansed and gently exfoliated. The result is skin that is hydrated, moisturized and restored, feeling soft, smooth and supple. As billions of microbubbles quietly pop around you, the energy they release also keeps bath water warm. Learn more on p 50.

# Acrylic Tub Features and Components

**A** Micro-jets

Arranged in clusters to complement the point-massage jets.

**B** Silent Air Volume Control

Allows you to adjust the amount of air mixed with water coming from the whirlpool jets. The more air, the greater the pressure. This also serves as the reservoir for cleaning solution for the Fill-Flush and Simple Touch cleaning systems.

**C** Simple Touch®

Activation switch for Simple Touch® whirlpool cleaning system.

**D** Overflow

Shown in the image on the opposite page is a round overflow with toe-tap drain. Above is the Slim-Line Integrated Overflow available on certain models.

**E** Control Pad

Low-profile control pads provide clean appearance and ease of operation. Air Massage Elite packages include a digital display, featuring 3 "SPA Mode" settings that automatically cycle through the various therapies in a preconfigured sequence.

**F** Aromatherapy

Aromatherapy well houses canister for adding pure essential oils.

**G** Whirlpool Jet

Fully-adjustable high-flow point-massage whirlpool jet. Various trim colors and custom finishes are available.

**H** Slip-Resistant Bottom

The texture of the bottom makes it slip-resistant for safety.

**I** Virtual Spout

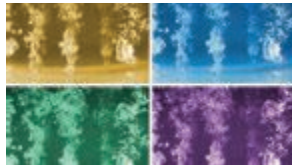

Integrated high-flow tub filler replaces the faucet.

**J** Water Sensors

Water sensors for activation of the air bath purge cycle 7 minutes after the tub water has drained.

**K** Chromotherapy

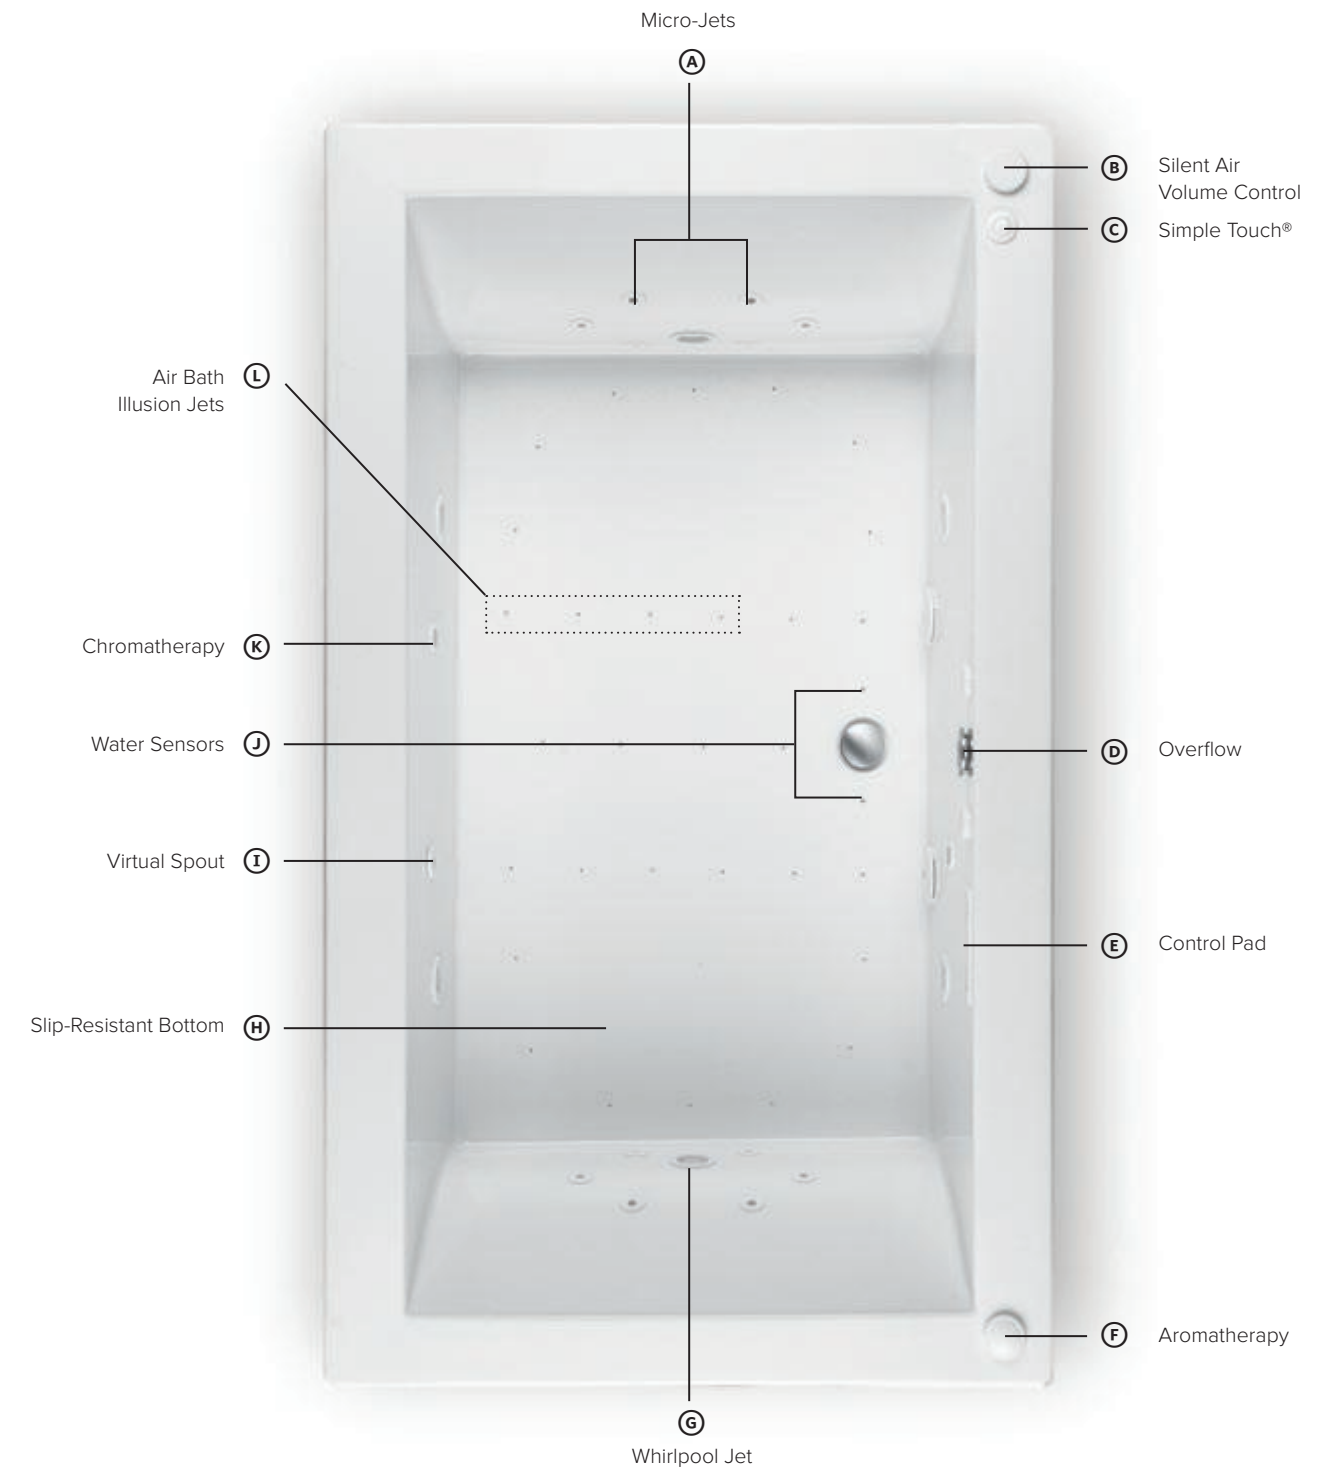

Chromotherapy LED light.

**L** Air Bath

Air bath illusion jets.

## ACRYLIC TUB CONSTRUCTION

Each tub is formed, assembled and finished by hand.

Constructed of non-porous, Lucite® XL cross-linked cast acrylic.

Highly durable finish is scratch- and stain-resistant.

Renewable finish because the color goes all the way through the material.

Non-porous surface is easy to keep clean and hygienic.

Thick mixture of fiberglass / titanium / resin reinforcement, making the bath shell up to 30% thicker than many competitor baths.

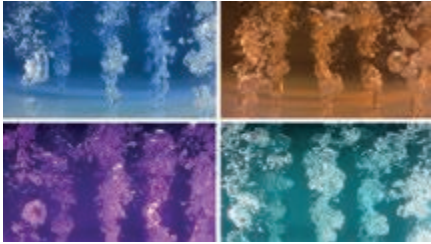

Increased structural rigidity.

Acts as an insulator to retain bath water warmth.

Tub interiors are ergonomically designed for maximum bather comfort.

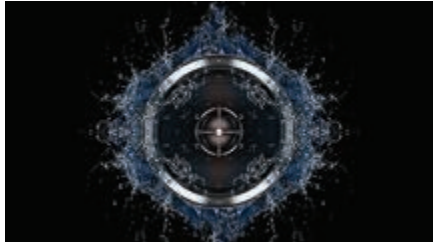

Metal reinforcement in rectangular and corner baths for extra strength.

# Popular Options for Acrylic Tubs

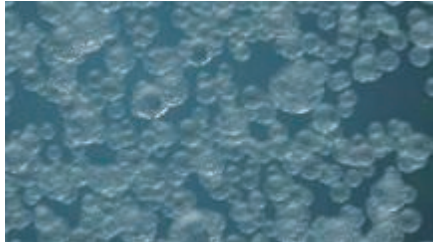

**CHROMATHERAPY**

Most MTI baths offer the possibility of including the therapeutic effects of chromatherapy through the use of underwater lighting provided by digitally controlled LEDs. A control button allows selection of constant colors or preset programs to achieve the desired lighting. Includes 2 digitally-controlled LEDs unless otherwise specified. While chromatherapy lighting can be added as a separate option, it is also included in a number of hydrotherapy packages.

**STEREO H<sub>2</sub>O**

Audiotherapy is delivered through high-performance acoustic transducers that are integrated with the bath shell's exterior to transform it into a sounding board. Two versions are available. One system includes 4 transducers with pre-wired leads from each so you can use the stereo receiver/amplifier of your choice or a product such as those available from Sonos, Inc. The second is an installed system ready to use with Bluetooth amp, on/off button and 2 integrated transducers. An optional waterproof, floating remote control is available for the Bluetooth system.

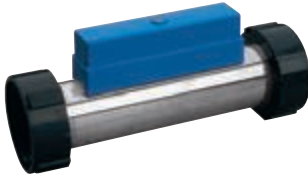

**MICROBUBBLES**

Microbubbles innovative technology draws water in from the tub and infuses it with up to 50% more dissolved oxygen. The water enters a compression chamber and then on to a turbulence chamber, which creates tiny bubbles the size of the head of a pin. Billions of these tiny bubbles fill the tub with such a density that the water turns milky white. These tiny oxygen-rich microbubbles gently remove impurities from skin and pores, leaving the body cleansed and gently exfoliated. The result is skin that is hydrated, moisturized and restored, feeling soft, smooth and supple. As billions of microbubbles quietly pop around you, the energy they release also keeps bath water warm.

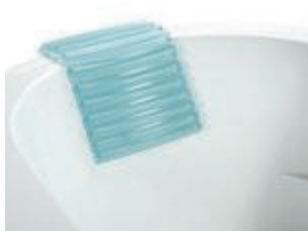

**RADIANCE®**

Radiance Bath Surface Heating System applies radiant heat to the interior surface of tub to make leaning back more comfortable. Factory-installed and fully integrated in the acrylic shell structure, the Radiance system includes electronic heating grids for 2 areas, plus all of the electronic controls. Two systems can be specified for a two-person tub. Radiance can also be applied to Designer shower bases.

**INLINE HEATERS**

Inline heaters are available for soakers, air baths and whirlpools. These systems do not heat cold water but maintain bath water temperature at 104° F. While an inline heater can be added as a separate option, it is also included in a number of hydrotherapy packages.

**PILLOWS**

Bath pillows provide support for head and neck. Four styles are available. All are removable. Shown is the most versatile, the Roll-Up pillow. It simply lays across the tub deck area and can also be rolled up for use in the lumbar area or under legs.

**GRAB BARS**

Enhance accessibility and safety within and around the tub with grab bars. Grab bars are available for most models of tubs and may be added to the flat inner wall of the tub. Choose curved acrylic or curved metal. Also available for drop-in tubs with a flat rim is the top-mount model shown.

**SLIM-LINE OVERFLOW WITH TOE-TAP DRAIN**

Sleek, low-profile overflow offers a clean appearance. Different finishes available. Overflow is factory-installed and applicable only to specific tubs.

**DRAIN KITS**

MTI has a variety of drains kits available for each tub. Available types are Lift & Turn, Toe-Tap and Cable Driven in different finishes. Drains and overflows are not installed at the factory, unless otherwise indicated on tub specification sheets.

**VIRTUAL SPOUT**

The High-Flow Virtual Spout offers a very discreet replacement for the traditional filler spout. It is factory-installed on an inside wall of the tub. Not only does it help provide an uncluttered appearance, but it removes the potential obstacle of a filler spout where that may be a consideration for bather safety.

**TILE FLANGES / ABS**

Available on most rectangular and corner baths. Whether factory- or field-installed, the rigid ABS tile flange is chemically bonded to the tub to ensure a water-tight installation between the top tub surface and the surrounding wall area.

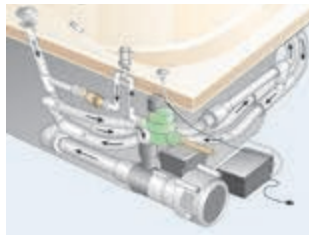

**PRE-LEVELED FRAME SYSTEM / FOAM BASE**

Frame of hardwood construction makes installation easy. High-density, non-deteriorating foam supports the bottom of the pre-leveled tub. Front or sides of the frame may be recessed for tile or marble application. Available on rectangular and corner tubs.

**OZONE**

The bath Ozonator, available in MTI whirlpool and Stream Bath tubs, is a safe, effective and natural bath sanitation system that works while the user is enjoying the whirlpool or Stream Bath. Ozone, nature's purest form of sanitizer and oxidation agent, kills all known bacteria, viruses, cysts, yeasts, molds and mildew and helps to rid the water of disease-causing microorganisms while you are enjoying the whirlpool or Stream Bath. The Ozonator system automatically starts and stops with the whirlpool or Stream Bath.

**WHIRLPOOL CLEANING SYSTEMS**

MTI's patented Fill-Flush® and Simple Touch® whirlpool cleaning systems are the best on the market. Designed to keep your whirlpool clean and hygienic, both systems circulate cleaning solution and fresh water through the entire plumbing system, including the water and air lines, large jets and pump. All this is achieved in fewer than 5 minutes and with less than 10 gallons of water. Fill-Flush is manual and Simple Touch is semi-automatic.

# Shower Bases

MTI's extensive range of shower bases offers an assortment of base shapes, sizes and drain locations, providing solutions for new construction and remodeling situations alike. Uncomplicated styling allows them to integrate beautifully with surround materials such as granite, marble and tile, while their functional design prevents water transfer and slipping. They offer clean contemporary design, unsurpassed quality and extreme durability.

**LOW-PROFILE  
MULTIPLE THRESHOLD  
End Drain**  
Available Sizes:  
48" x 32" • 48" x 36" • 60" x 30"

# Teak options for showers and tubs

MTI offers a large range of teak products for the bathroom for both accent and function. All are manufactured in the USA using only 100% U.S.-certified legal, reclaimed, sustainable teak. Crafted of the finest grades of genuine teak, MTI's teak products introduce an organic element to the bathroom that is both soothing and stylish. Its texture and warmth also contribute to a spa-like feel.

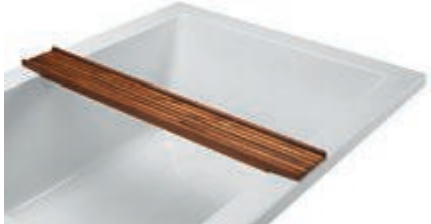

**SHOWER SEAT**  
Folding seat with stainless steel hardware. Natural or High-Polished; 22" x 15".

**PREMIUM SHOWER SEAT**  
Features 1" wide x 2" thick teak slats and a heavy duty 11-gauge tubular stainless steel frame in Natural or High-Polished finish. 24" x 16"

**BATH MAT AND SHOWER TRAY**  
Both available in a variety of sizes.

**TUB TRAY**  
For book or beverage. Custom fit for flat-rimmed rectangular tubs. Slatted version shown. Also available in a solid, one-piece design.

**HIDDEN DRAIN COVER**  
Designed for MTI's multiple-threshold shower bases with hidden drain.

**FEATURES AND BENEFITS OF MTI GENUINE TEAK ACCESSORIES:**

Genuine teak has the natural ability to **ward off fungi, mold and mildew.**

Teak **withstands the wet environment** of the bathroom.

**Emits a slight teak aroma** while showering.

**Variety of teak shower seats and trays** available.

# Bar, Prep & Laundry Sinks

**HARVEST**

## FEATURES AND BENEFITS OF MTI DESIGNER BAR, PREP & LAUNDRY SINKS:

Constructed using **Lucite® cross-linked cast acrylic.**

Backed with a thick layer of fiberglass/resin/titanium for **structural reinforcement.**

Surface is **extremely scratch- and stain-resistant.**

Non-porous surface makes **cleaning and sanitizing easier and faster.**

Available in **assorted colors.**

**LIBERTY**

**BAR & PREP SINK HARVEST**  
40" x 18"

**BAR & PREP SINK LIBERTY**  
15" round

**BAR & PREP SINK SEQUEL**  
16" square

**LAUNDRY SINK JENTLE JET 120J**  
25" x 22" Undermounted

**LAUNDRY SINK JENTLE JET 120J**  
25" x 22" Drop-in

**UNIVERSAL**  
laundry / utility sink  
25" x 22"

**VERSATILE**  
laundry / utility sink  
25" x 22"

**JENTLE JET® 110J**  
jetted laundry sink  
25" x 22"

**JENTLE JET® 120J**  
jetted laundry sink  
25" x 22"

Designer bar, prep and laundry sinks are both practical and beautiful. Models are available in different styles and colors and designed to integrate with a variety of decors. MTI's patented jetted laundry sinks use jets instead of an agitator to wash fine wearables. This demonstrates how MTI applies bath technology to different areas of life to provide products that save time and offer convenience.

# Our Culture

## J.C. HENRY – OUR FOUNDER

J.C. Henry founded our company in 1988. He was a self-made man, a driven entrepreneur and resourceful in developing unique manufacturing processes still used today.

Against sound advice, he started a company in the challenging financial climate of a time when the interest rate was over 20% and his own age was nearing 60. This spirit of risk-taking was inspirational and integral to MTI's culture. He relentlessly pursued the highest quality of product as the only acceptable outcome.

## KATHERINE ADAMS – OUR CEO

In 1998 J.C. chose his successor, our CEO Kathy Adams. Building on J.C.'s legacy of the highest quality products, Kathy applied her business background and brought a new focus on superb award-winning designs to establish MTI as the luxury brand it is today.

The nucleus of MTI's thriving culture is dedicated individuals who love what they do. Kathy is the educator who defines an MTI leader as one who enables others to succeed.

## NEXT CHAPTER - EMPLOYEE OWNERSHIP

We are honored and humbled to be chosen numerous times as one of the top places to work in Atlanta.

When J.C.'s health deteriorated and the acquisition deal fell through in 2001, MTI employees invested their 401k savings and refinanced their homes to purchase the company from J.C. so that we could continue. Since then MTI has been an employee-owned company, which is a rare occurrence in today's business world.

It is not uncommon at MTI to have many families working together and many employees working more than 10 years with us. We strive to build a strong community within MTI and our neighborhoods.

## CULTURE OF EMBRACING CHANGE LEADS TO INNOVATION

By consistently listening to the market, and embracing change, MTI thrived. MTI is the first company in the USA to launch a full product line in Engineered Solid Stone®. Some of our most important innovations include the most hygienic air bath systems and patents on the Fill-Flush® cleaning system and Gentle Jet® laundry system. MTI was also a leader in moving the industry to be design-driven and, through its Woodward Mill House, created the most creative, exciting and experiential training program in the industry.

## AWARDS

MTI has received more than 100 awards for design excellence and product innovation with Russell Adams as our Chief Design Officer and President. The common thread within the design team's philosophy is "design with purpose". More than creating products that are merely high in design aesthetics, the design team maintains a focus on creating products that will satisfy the needs of people and enrich their lives.

## CUSTOMIZATION

At MTI we offer the ultimate in customization, working with you to create products that are uniquely yours. You can also select from some creative options we offer as well.

And if you work in the hospitality, multi-unit housing or spa industries, our Project Group together with our Design Studio will work with you to modify a current design or make a custom one.

We have a can-do, will-do attitude.
